"KALAMAZOO KIND"

Just a Word to Our Friends

WE TAKE just a little pride, pardonable pride we trust, in presenting to you our 1911 Sleigh Catalog.

We do not manufacture sleighs as a side line, or at a time when we do not happen to have anything else to do, because that time has never come with us. Manufacturing sleighs is as much a part of our business as is that of making four-wheeled vehicles. One of the large buildings of our plant is devoted almost entirely to the manufacture of the largest and most complete sleigh line turned out of any vehicle factory in this country.

Far be it from us to brag, but we must tell the truth, hence we say that no vehicle factory in this big country of ours is so well equipped to serve your sleigh needs.

Terms of Sale

All goods are sold f. o. b. cars Kalamazoo, Michigan, unless otherwise arranged. Positively no goods on consignment. All accounts must be settled within 30 days, either by cash or by note, dated from date of invoice.

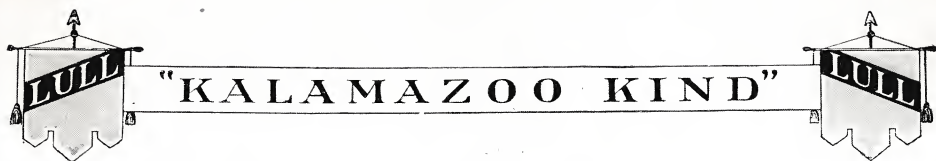

Shipping

We load on cars free of charge, crating all work carefully and securely. We positively will not be held responsible for the safe carriage or delivery of goods after they have been receipted for in good order by the transportation company, but will always aid our customers as much as possible to recover damage from the transportation company.

We obtain the best freight rates possible, but in no case guarantee them or allow overcharge to be deducted from remittance. In cases of overcharge, if our customers will forward to us the freight expense bill, we will assist them to recover same from the transportation company.

Warranty

All goods sold by us are guaranteed to be as represented and, should any part prove defective either in workmanship or material within one year from date of purchase, it may be returned to our factory and we will repair or replace same. Under no circumstances will we allow repair bills contracted away from our factory unauthorized by us.

General Description of Sleighs

Bodies

We pay particular attention in designing our Bodies to be sure that they are comfortable and at the same time stylish and attractive. They are correctly built of good air seasoned lumber, the panels are of whole stock and are glued and screwed to frame. The framework of the body is made of the very best hardwood. Good heavy nose irons run full length of dash.

Gears

The knees, Beams and Runners are made of second growth Rock Elm. This timber has proven by experience to be the best for the purpose as it will stand exposure and wet weather better than Hickory or other timber. The Braces and T irons are of wrought iron and are attached to the Knees by Clips, making a very strong connection, and in this manner we do not weaken the Knees by drilling holes through them.

Painting

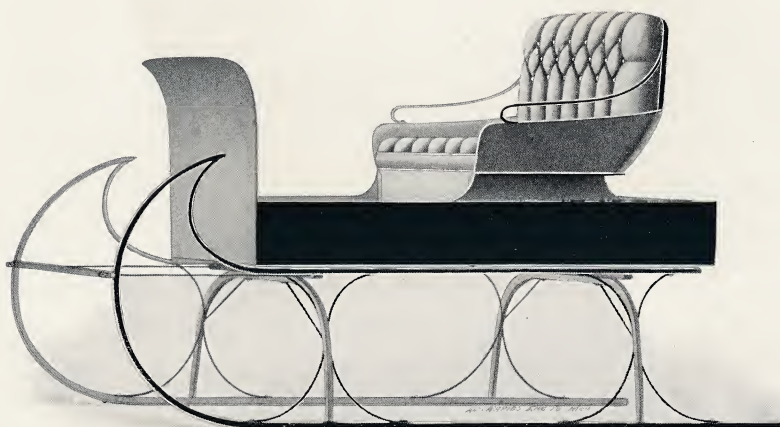

We use the old lead and oil system of painting and every coat is allowed to thoroughly dry before the next coat is applied. We invite criticism on our painting and guarantee our Sleighs to be as nicely painted as any similar grade Sleigh on the market. The Sleigh Bodies are all nicely striped and we can vary the style of striping to suit our customers.

Trimmings

All Portlands and Old Comforts have removable trimmings. All Backs are made up on solid wood panels instead of cardboard and are well padded. We furnish regularly cloth or whipcord trimmings, but carry a complete stock of velours, crushed plush and car plush in the different grades and can furnish anything desired in this line.

Shafts

Our shafts are made of good air dried timber, with solid eyes and well bolted. We iron our own Shafts, which enables us to give our customers a much better ironed Shaft than is regularly used.

Our No. 31 Square Box Sleigh

Regular 24-inch Piano Body bolted on to Cutter Gear with four bolts. Seat complete with high panel Back. Spring Cushion and Back trimmed with Green or Blue Cloth. High Wood Dash as shown in illustration. Knees are one piece bent to form. Gear is exceptionally well ironed and braced.

"KALAMAZOO KIND"

Our No. 31 Sleigh Gear

We manufacture this Gear to meet the demand for a simple, strong and reliable Gear, to be used by taking your Buggy Body and attaching it to same. This is without doubt the best Gear on the market. It is extra strong and well ironed and is in great demand in sections of the country where sleighing is uncertain. It only requires a few minutes' time and four bolts to attach your Buggy or Runabout Body on this Gear, giving you an up-to-date Cutter. Constructed so that you can use your regular Buggy Shafts.

Equipped with our special Quick Shift Hitch so that the horse can be driven either in the center or at the side. Knees 17 inches high. Gear is well braced and painted either in Green or Red as ordered.

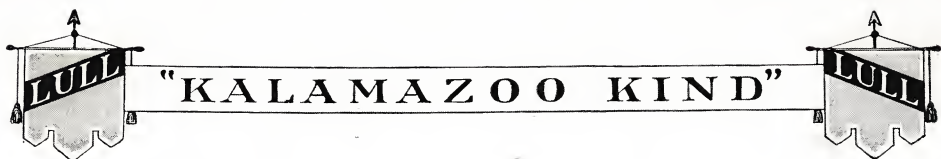

TRACK—3 feet 1 inch out to out.

Shipping weight 50 pounds.

Our Shifting Rod Shaft

The above illustrates our Keene Shifter Shaft, which is in great demand in New England and other Eastern territory. It is a very popular and effective shifting device and we are prepared to furnish it on any of our regular cutters. We shall be glad to quote price on request.

Wheel Vehicles

In this Catalogue we have not mentioned anything in regard to the best line of up-to-date Buggies, Surreys, Driving Wagons and Delivery Wagons on the market simply because it would make a Catalogue very cumbersome should we attempt to illustrate and describe our complete line.

We publish a separate and complete Catalogue of the "KALAMAZOO KIND" Wheeled Vehicles, which we shall be pleased to place in your hands upon request.

Very truly yours,
LULL CARRIAGE COMPANY.
